Thank You for the Chipper From the PHS Forestry Program

Philomath High School forestry students and program director/instructor, Simon Babcock, would like to thank the following community members for their assistance in helping out the forestry program this 2008-09 school year.

Chipper: Replacing the High School Forestry chipper has been a priority for many years. We found a great machine in California and several weeks of negotiations we had a used (new to us) chipper sitting in California ready to be hauled to its new home with the students. To get the equipment to its new home in Philomath we called upon Scotco Trucking of Philomath (owned by Scott Klein) to deliver the chipper to Oregon. Again a great example of a community coming together with a variety of resources and now the students have a safe, reliable and industry level chipper to use as they work around the community on a variety of projects.
