Thank You for the use of the Lathe From the PHS Forestry Program

Philomath High School forestry students and program director/instructor, Simon Babcock, would like to thank the following community members for their assistance in helping out the forestry program this 2008-09 school year.

Lathe: The lathe that was once used to peel logs at the famous Albany Timber Carnival is now owned by Scott Hyde. Scott Hyde was a community member who as a high school student went through a forestry program much like the one at Philomath High School. Scott would donate his time and lathe to peel our logs for our home competition. He had the lathe set up off the road across from Mary's River Lumber where many community members would stop and watch him peel logs in the evening or weekends. Two years ago Scott moved to Australia to get married and start a family. He wanted to loan the lathe to the forestry program while he was away so that we could continue to peel our logs. The ownership of the lathe is still Scotts but has allowed us to store and use it while he is away. It has been a great tool and fun to operate. Like most equipment there is some maintenance that is required with the lathe. The blade needs to get the cutting edges replaced from time to time. D and M Saw & MFG out of Albany would donate their time and resources to the Timber Carnival and have graciously continued to do the same for the High School Forestry Program.
